

ELEMENTS® LVT Flooring Maintenance Kit

PLEASE READ CAREFULLY

To maintain your new Elements® LVT floor, we recommend the use of Dr Shutz LVT Care Kit. This is a comprehensive cleaning kit which has been formulated for use on all types of vinyl and resilient flooring, and is especially suited to Luxury Vinyl Tiles (LVT).

The Dr Shutz LVT Care Kit is designed to keep your floors in immaculate condition in high-traffic and demanding areas such as hallways, bathrooms, and kitchens.

The kit enhances anti-slip properties with a natural matt care film that preserves the appearance of your new floor, while the included special cleaner ensures long-lasting protection and easy maintenance.

The kit contains the various tools and instructions necessary to complete the maintenance.

1. First use Clean and Strip — an intensive cleaning and dirt removal solution. This removes the remains of old care products, stubborn stains and adhesive residue on newly installed or heavily soiled vinyl.
2. Then use Floor Mat — an initial protection and care treatment which will protect your LVT floor for many months, depending on wear.
3. Finally, use Floor Cleaner R1000 — a routine cleaning solution which cleans, protects and adds safety to the LVT flooring in one step.

The Dr Shutz LVT Care Kit can be purchased directly from the manufacturer:
